Cloud Operations Dashboard

Operational monitoring for the Cloud Resume application.

Monitoring Domains

- Application Health
- Availability
- Function Health
- Deployments
- Cost & Consumption
- Cosmos DB Operations
- Security & Access Monitoring

Application Health

Monitor application behavior, reliability, and performance across the Cloud Resume platform.

Use these metrics to track request volume, success rates, response performance, and application exceptions.

Review trends and failures to quickly identify service degradation and support operational troubleshooting.

Request Count (24h)

5

Failed Requests

0

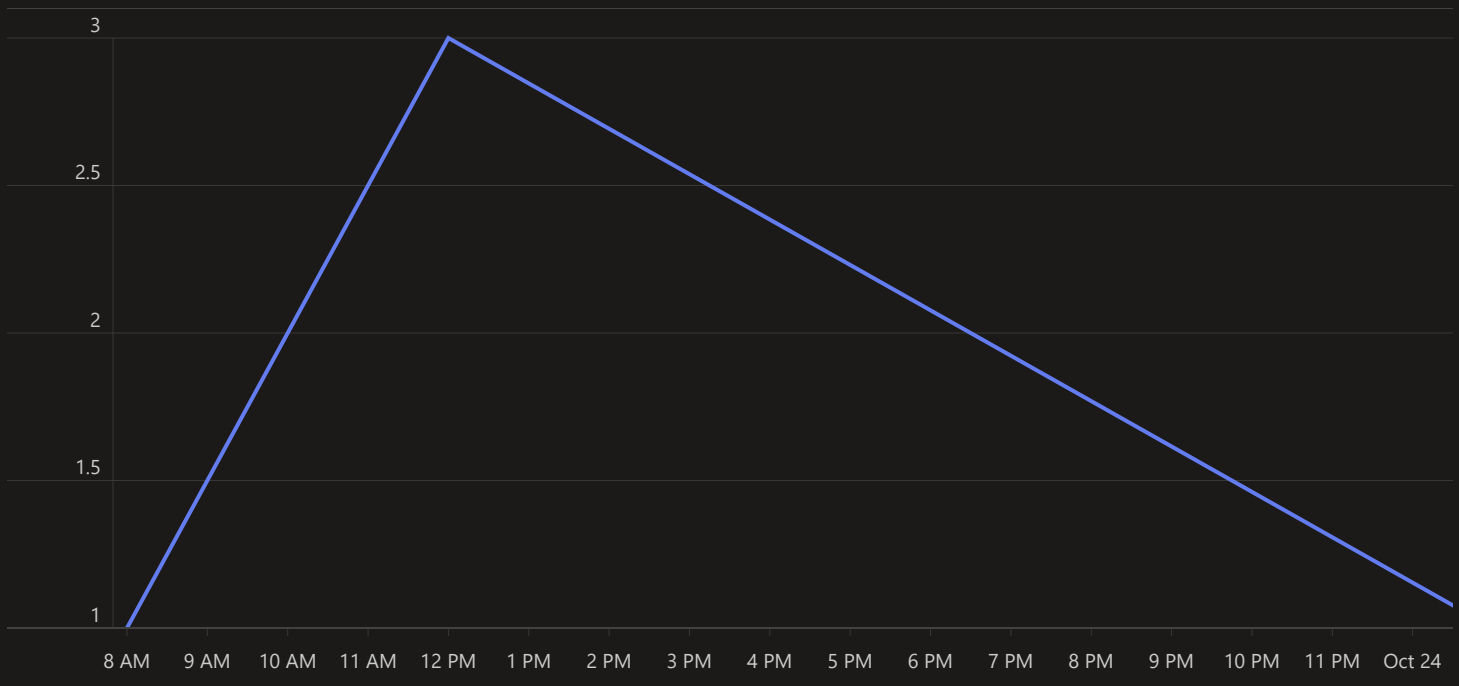

Success Rate

100.0%

Exceptions

1

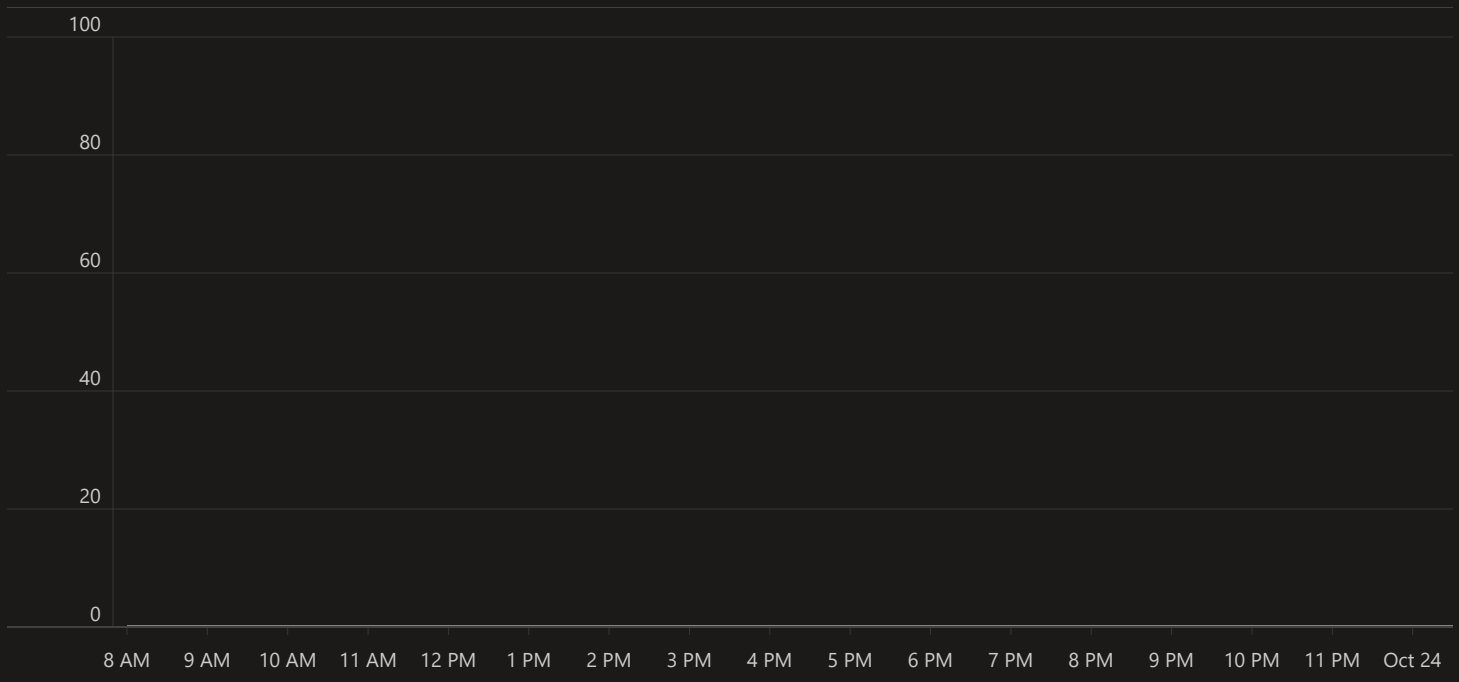

Request Volume Trend

Requests (Sum)

5

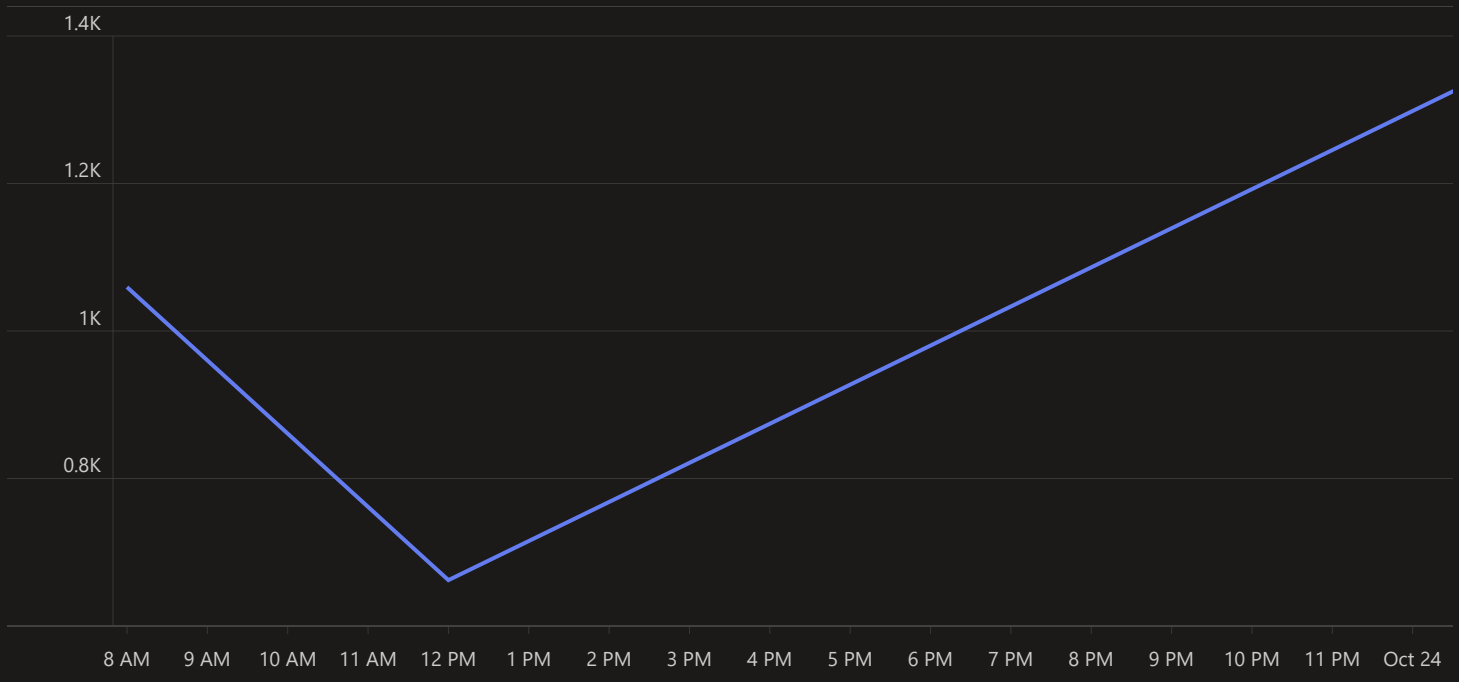

Failed Requests Trend

FailedRequests (Sum)

0

Response Time Trend

AvgDurationMs (Sum)

3.07 K

Availability

Monitor application availability and synthetic test results for the Cloud Resume platform.

Use these metrics to track uptime, identify failed availability checks, and review performance trends across monitoring locations.

Review availability failures and trends to quickly identify service interruptions and validate user accessibility.

Availability (%)

100.0%

Availability Failures

0

Availability Trend

Recent Availability Results

timestamp	location	success	ResponseTimeMs
10/24/2026, 8:18:20.570 AM	Central US	1	100
10/24/2026, 8:18:13.844 AM	North Central US	1	186
10/24/2026, 8:18:05.274 AM	West US	1	269
10/24/2026, 8:16:13.460 AM	East US	1	181
10/24/2026, 8:13:20.548 AM	Central US	1	144
10/24/2026, 8:13:13.821 AM	North Central US	1	144
10/24/2026, 8:13:05.246 AM	West US	1	165
10/24/2026, 8:11:13.437 AM	East US	1	165
10/24/2026, 8:08:20.536 AM	Central US	1	200
10/24/2026, 8:08:13.801 AM	North Central US	1	209
10/24/2026, 8:08:05.232 AM	West US	1	203

Function Health

Monitor Azure Function execution activity, failures, and response performance for the Visitor Counter API.

Function Executions (24h)

5

Function Failures (24h)

0

Function Avg Duration (ms)

879.48

Deployments

Monitor deployment activity and pipeline execution for the Cloud Resume application.

Use these metrics to identify recent deployments, track deployment activity, and correlate releases with application health and availability changes.

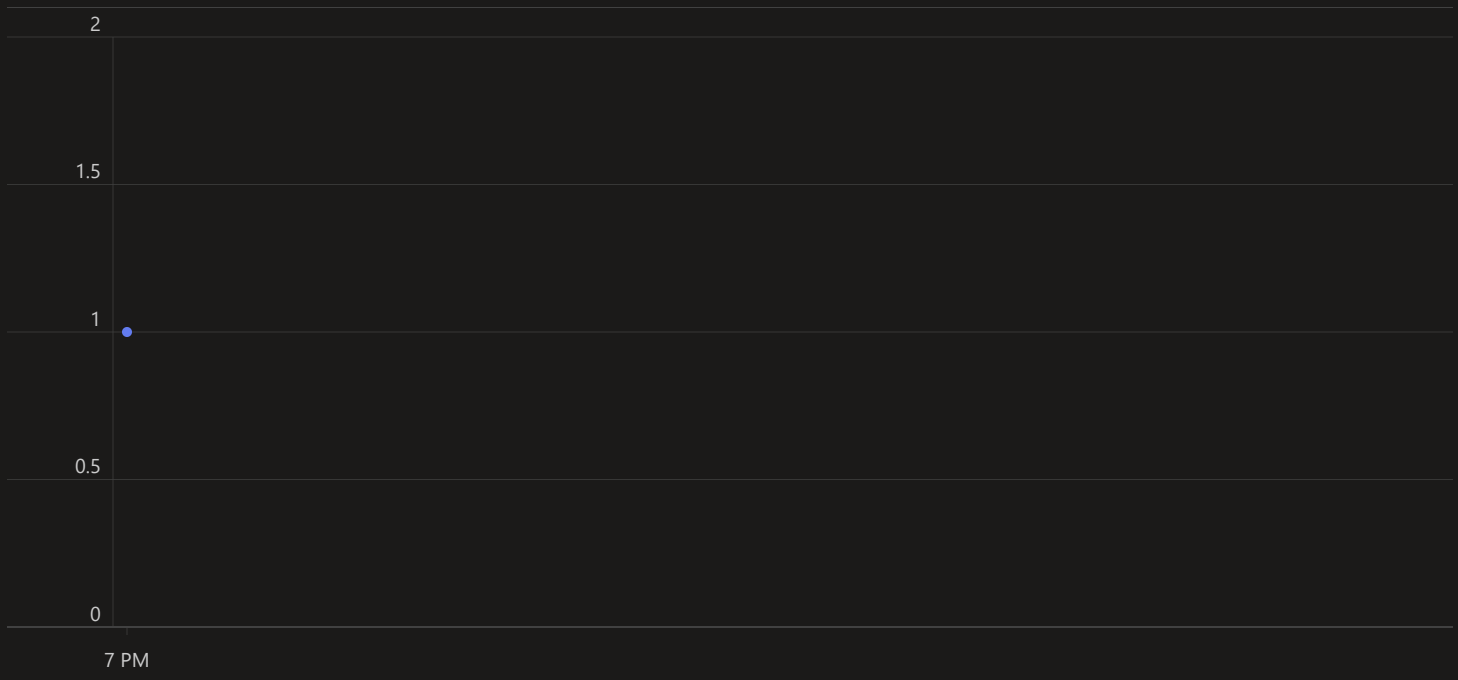

Last Deployment

2026-10-23T17:36:52.7158856Z

Successful Deployments (24h)

1

Deployment Activity Trend

Cost & Consumption

Monitor telemetry volume and resource usage patterns that contribute to operational costs across the Cloud Resume application.

Use these metrics to identify growth trends, ingestion spikes, and potential cost drivers.

Telemetry Events (24h)

1.78K

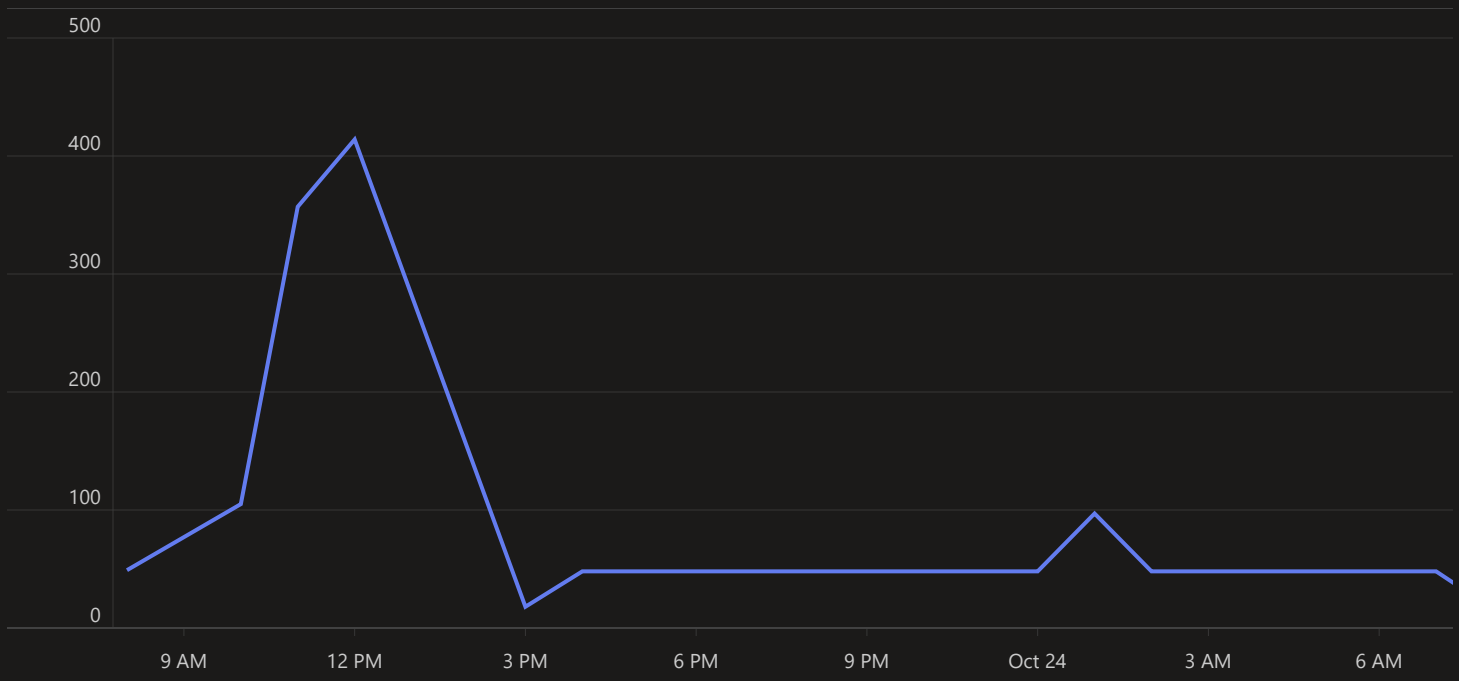

Trace Events (24h)

968

Availability Tests (24h)

802

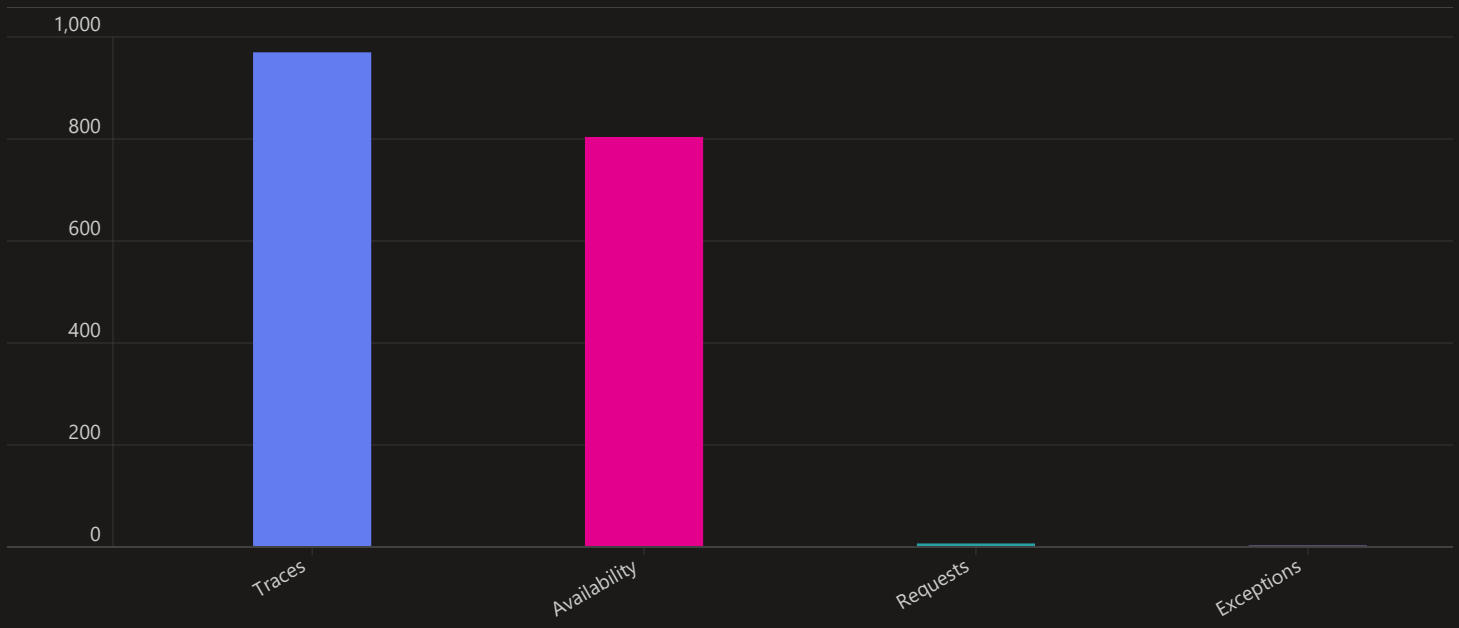

Telemetry Volume Trend

Events (Sum)
